PROFILE SUMMARY

MCA student and aspiring Software Engineer with strong hands-on experience in Flutter, Dart, Firebase, Node.js, REST APIs, and application development. Experienced in developing mobile, web, and backend-focused projects involving authentication, databases, real-time communication, state management, and Clean Architecture. Completed freelance development work and academic/personal projects across chat applications, business systems, and high-performance file transfer.

TECHNICAL SKILLS

Languages: Dart, Java, JavaScript

Frameworks & Development: Flutter, Flutter Web, Node.js, Express.js, Android Development

Backend & APIs: REST APIs, API Integration, Socket.IO, JWT, Firebase Admin SDK

Databases: Firebase Firestore, PostgreSQL, MySQL, MongoDB, SQLite

Architecture & State Management: Clean Architecture, MVVM, Riverpod, Provider

Tools & Platforms: Git, GitHub, Postman

FREELANCE DEVELOPMENT EXPERIENCE

Freelance Flutter Developer — Remote

April 2025 – September 2025

- Developed Flutter-based application features for a business management project using Dart, Firebase, REST APIs, and SQLite.
 - Implemented and modified features across admin dashboards, master data, lot/tag management, and stock workflows.
 - Worked with an existing Flutter codebase, analyzing architecture, debugging issues, and implementing feature-level changes.
 - Integrated backend APIs and local database functionality while translating business requirements into application features.
-

PROJECTS

Fast Share — High-Speed LAN File Transfer

Flutter | Dart | TCP | Socket Programming | Riverpod

- Developed a LAN-based file-transfer application using Flutter, Dart, and TCP socket communication.
 - Implemented chunk-based streaming for large-file transfers and achieved approximately 50 MB/s during local network testing.
 - Built real-time transfer progress, speed monitoring, pause/resume, and cancellation workflows.
 - Designed transfer architecture using Riverpod, focusing on efficient streaming and scalable file-transfer workflows.
-

Bhagwati — Jewellery Management & Admin System

Flutter | Dart | SQLite | REST APIs | Flutter Web

- Worked on an existing Flutter-based jewellery management application covering **master data, lot management, product tagging, stock management, and administrative workflows**.
 - Analyzed and modified the existing Flutter codebase, controllers, **SQLite storage**, and API integrations.
 - Implemented and refined inventory and stock-management features based on business requirements.
 - Debugged and extended application functionality through **REST APIs and existing backend response structures**.
-

QuickMessenger — Real-Time Chat Application

Flutter | Firebase | Node.js | Socket.IO | SQLite

- Built a real-time messaging application using Flutter, Firebase Authentication, and Cloud Firestore.
 - Implemented messaging, authentication, user interaction, and application data workflows.
 - Integrated SQLite for local persistence and Socket.IO + Node.js for real-time communication.
 - Applied Riverpod and Clean Architecture to organize application state and maintain a scalable codebase.
-

EDUCATION

Master of Computer Applications (MCA)

Atmiya University, Rajkot | Expected 2027

Bachelor of Computer Applications (BCA)

Geetanjali College, affiliated with Saurashtra University, Rajkot | 2025

CGPA: 8.56/10
